TRAINING COMPANY	Presentations Series 1
COMPANY	Openings and Conclusions
2011171111	
Greeting	Good morning everyone.
Greening	Good afternoon everyone.
	My name is (pause) John Wilson and I'm a (pause)
	project manager for (pause) Rivasoft. I am Petra Stilov and I run Rivasoft's European
	Office.
Introduction	My presentation is about Managing Virtual Teams.
Fundain numana	I'm here to talk about Managing Virtual Teams.
Explain purpose	The purpose of my presentation is to explain how to manage virtual teams.
	In this presentation my goal is to explain how to
Outline structure	manage virtual teams.
Outline structure	I've divided my presentation into 3 parts: Cultural Differences, Management and Virtual Teamwork.
	Today I'd like to cover 3 main ideas.
Outline atmost	I'll answer any questions at the end.
Outline structure	Firstly cultural differences, then management and finally virtual teamwork.
	Firstly cultural differences, secondly management,
	thirdly virtual teamwork.
	At the end I'll give out a handout that includes all the presentation slides.
Openings - Stimulate interest:	In a survey of 3000 multinational companies, 83%
Interesting facts	had problems with virtual teams' performance.
	8 out of 10 professionals have worked in virtual teams.
	According to Harvard University, by 2020 virtual
	teams will be the norm in most companies.
Openings - Stimulate interest: Ask questions & rhetorical questions	Raise your hand if you have worked virtually? Anyone like to make a guess?
The following a motorioal queenene	How can we improve communication between virtual
Openings Otionulets interest	teams?
Openings - Stimulate interest: Emphasise importance	This information is important for decision-making within virtual teams.
	As you are all involved in virtual teams you need to
	know how to adapt your management style.
	Adapting your management style is crucial to understanding the problem.
Openings - Stimulate interest:	Remember back to when you managed your first
Ask the audience to imagine	team. What would you do differently now?
themselves in a situation	Imagine you're leading a virtual team based in 4 countries. How would you kick-off the project?
	Have you ever been in the situation where
0	communication doesn't flow between team members?
Summarising	There are 3 main points to remember: cultural differences, management and virtual teamwork.
	To sum up, there are 3 main areas; cultural
	differences, management and virtual teamwork.
	As we've seen in this presentation today, the main ideas were cultural differences, management and
	The state of the s

	virtual teamwork.
Summarising	To summarise the 3 main areas are cultural differences, management and virtual teamwork. At this stage I'd like to go over the key points. As we've seen in this presentation today the three main points are cultural differences, management and virtual teamwork.
Recommendations	The recommendation would be to focus strongly on relationships in the beginning. We recommend that you focus strongly on relationships in the beginning. What I'd like to propose is focusing on relationships in the beginning.
Conclusions	In conclusion, the keys are to focus strongly on relationships, trust and communication. I'd like to finish by recommending focusing strongly on relationships, trust and communication. I'd like to leave you with the following thought "Strong Virtual Teams are built on Strong Relationships".
Conclusions	Finally it is important to note that strong virtual teams are relationship teams. Let me finish with the following idea, "Strong Virtual Teams are built on Strong Relationships".
Questions	If you have any questions, I'd be pleased to answer them now. Any questions? All the presentation slides are included in this handout.

A myrr

TRAINING COMPANY	Presentations Series 2
COMPANY	Main Part (Body)
Outline structure	I've divided my product presentation into 3 parts:
	sales, distribution and logistics.
	Today I'd like to cover 3 main ideas.
Outline structure	l'Il answer any questions at the end. Firstly I will talk about sales, then distribution and
Outline structure	finally logistics.
	Firstly I will talk about sales, secondly distribution
	and finally logistics.
	At the end I'll give out a handout that includes all
Signposting:	the presentation slides. Let's begin by talking about sales.
Introducing a point	Let's start with sales.
maddenig a penn	My first point is sales.
Signposting:	My next point is distribution.
Next point	Let's move on to the next point, distribution.
Link cause to effect	Now we come to my final point, logistics. Losses in March 2012 were due to a rise in sales tax.
Link cause to effect	Losses in April were caused by a rise in transport and
	delivery costs.
	Losses in May resulted from defective products being
	withdrawn from sale.
Link cause to effect	Mismanagement led to losses in the first 6 months.
	A strategy rethink resulted in increased profits. Increased oil prices caused losses in the first quarter
	of 2013.
Present main ideas:	I'd like to elaborate on my first point, sales.
Giving more detail	Let me expand on my second point, distribution.
	This means that increasing market share is critical. The reason that market share is critical is because
	new competitors are looking to enter the market.
Signposting:	I'd like to look at last year's financial results.
Referring to something	As you can see in graph 5.
	If you turn to page 8 in the handout you'll see graph 5.
Describe graphs, charts and data	Graph 5 shows the rise in operational costs.
	Have a look at this model. What's wrong with it?
	Let me show you a chart that summarises this point.
Compare ideas	On one hand we can see rising operational costs and
	on the other stagnating profit margins. By contrast what we notice is a rise in market share.
	Conversely what we notice is higher fixed costs.
Emphasise ideas	Also operational costs were less than last year.
	In addition operational costs were less in 2012.
Express opinions	Additionally, operational costs were lower in 2012.
Express opinions	In my opinion this trend will also continue next year. In my view this trend will not be repeated this year.
	It seems to me that this trend will continue this year.
Recommend	The recommendation would be to change suppliers.
	I recommend that we renegotiate with the supplier.
	So what I'd like to propose is to renegotiate with the

	supplier.
	I propose that we renegotiate the supplier's contract.
Reject	From my point of view we shouldn't support this
	proposal as it's just not cost-effective.
	I think we should reject this option based on the
	arguments presented.
	In my opinion we ought to discard this option
	because it's not feasible in terms of the project's time
	limits.
Summarising	So there are 3 main ideas to remember.
	To summarise there are 3 main points to remember.
	As we've seen in this presentation today, the main
	ideas were sales, distribution and logistics.
	To recap the main points were sales, distribution
	and logistics.
Conclusions	In conclusion projects need buy-in at all levels of the
	company to be successful.
	I'd like to finish by recommending the importance of
	achieving buy-in from all departments in the company.
	I'd like to leave you with the following thought,
	"people make projects".

To sum up there are 3 main points to remember.

There are 3 main points to remember.

Summarising

	To summarise there are 3 main points to remember.
	As we've seen in this presentation today, there
	were 3 main ideas.
	Let's recap the main ideas.
Recommendations	The recommendation would be to spend more than
	70% of your time on design and planning.
	We propose that you
	So what I'd like to propose is
Concluding	In conclusion, it is important to
	I'd like to finish by recommending
	I'd like to leave you with the following thought.
Ending	If you have any questions, I'd be pleased to answer
	them now.
	Here is a handout that contains the main ideas of my
	presentation.

A MY I D

TRAINING	Presentations Series 4
TRAINING COMPANY	
[COMPANY]	Describing Graphs and Figures
Introduction	Ok let's look at the graph for 2012.
madadan	This graph compares operational costs to profits.
	This chart compares operational costs to profits.
	This graph shows operational costs from 2008 to
	2013
	This chart shows operational costs from 2011 to
Deferring	2013.
Referring	As this graph shows we can see operating costs rose in March 2010.
	As you can see operating costs rose in July 2010.
	This part of the graph clearly shows a sharp rise in
	operating costs.
Move from point to point	Ok I'll start by explaining operating costs in 2010.
	First we'll look at 2010. Next, we'll look at 2011.
D 21.2	Let's move on to the next point.
Describing: Go up quickly	Prices surged in April 2011. Prices soared in May 2011.
Go up quickly	Prices shot up in May 2011.
Describing:	Costs rose slowly in May in 2011.
Go up slowly	Costs increased steadily in May 2012.
	Costs went up gradually in May 2011.
Describing:	Share prices slumped last year.
Go down quickly	Share prices plummeted last year.
December of	Share prices plunged last year. Market share slide in June 2012.
Describing: Go down slowly	Market share decreased slowly in June 2012.
Go down slowly	Market share went down gradually in June 2011.
Describing:	Revenues bounced back in May 2009.
Recover	Revenues recovered in May 2011.
Describing:	Growth reached a plateau in March 2013.
Maintain the same level	Growth levelled off in March 2012.
December of	Growth stabilised in March 2013.
Describing: Reach a high point	Productivity peaked at 6% in the middle of May. Productivity reached a high point of 6% in April.
Describing:	Operational costs hit rock bottom in June 2011.
Reach a low point	Operational costs bottomed out in June 2012.
	Operational costs collapsed to it lowest level in
	June 2010.
Describing:	In the Q1 (first quarter) there has been a sharp rise.
Trends	Since October 2012 and until January 2013 prices
	have stagnated. The trend was increasing costs between June and
	October 2012.
Describing:	Over the short term we are expecting a fall in profits.
Future trends	Over the short run we are expecting a rise in profits.
	Over the medium term there will be a fall in profits.
Describing:	Over the medium run there will be a fall in profits.
Future trends	Over the long term we'll see a rise in profits.
Emphasising a point	Over the long run we'll see a rise in profits. We do see a need for implementing this plan now.
Emphasising a point	THE AD SEC A HEED IN IMPLEMENTING THIS PLANT HOW.

What I'm suggesting are cuts in production.
We need to reduce packaging size and weight.

TRAINING COMPANY	Presentations Series 5
COMPANY	Answering Questions
COMPANY	Allsweiling Questions
Explain when you will answer	I have set time aside at the end of my presentation
questions	for questions.
•	If you have any questions, I'll answer them at the
	end.
End of presentation	Please save your questions until the end. Any questions?
End of presentation	Now for the questions.
	Let's begin with the questions.
Breaking the ice	Someone asked me, "what if this trend doesn't
(when nobody wants to start asking	happen until 2015?"
questions)	A question many people ask is, "what if this trend occurs earlier?"
	One question that people usually ask is "what if
	this trend happens in 2014?"
Repeat the question	So what you're saying is "that it is more complicated
(in your own words)	than expected", is that right?
	"That it is more complicated than expected", correct? As I understand what you saying is "that it is more
	complicated than expected", is that correct?
Asking for repetition	Sorry I didn't catch that, can you repeat that again?
	I'm sorry, could you repeat that?
	I'm not sure I understand. Can you explain that
	again? Can you explain that in a different way?
Good questions	I'm glad you asked that.
'	Thanks for bringing up this key point.
	Good point. Good question.
Good questions	That's a very good question. Interesting point. What do you think?
	What would you do?
Difficult Questions	Sorry I don't know that off the top of my head.
	I don't have that information at hand.
	I'm afraid I don't have that information with me.
Difficult Questions	Sorry, I'm not in a position to comment on that. Your question covers a wide area. Let me answer it
Difficult Questions	point by point.
	To be honest I think that raises a different issue.
	I'd rather discuss that at another time, if that's OK.
Poterring to the presentation	I'll look into that and I'll get back to you.
Referring to the presentation	Well as I mentioned earlier this trend is rising. Well as I said before this trend happened in 2000.
	I think we covered that in the first part.
	I think I answered that earlier.
Irrelevant Questions	I'm afraid I don't see the connection.
	Sorry, I don't follow you. Can you clarify?
Final Conclusion	I think that's best answered in another presentation I'd like to finish by saying, "people make projects".
	I'd like to leave you with the following thought,
	"people make projects".
	As a final conclusion, "people make projects".

Presentations Platinum Series 6 Good International Presentation (example) Welcome Good morning and could I start by saying I am very pleased to be at your conference today to talk about the future role of public broadcasting. I would like to thank the EBU for inviting me to speak today here in Copenhagen. My name is (pause) Peter Williams and I was the (pause) Ex-Director General for (pause) the BCBC. Explain presentation purpose My position is this. I believe that for political, conomic and technological reasons, public broadcasters are looking at the future and questioning what their role will be, and that is what I will be addressing today. The goal of my presentation is to help and explain the future role of public broadcasters. But first let me start by explaining my background. I started as a journalist before occupying a range of managerial positions over 15 years. I then joined the BCBC and in my 6 years in charge we developed revolutionary services such as, 5 digital television channels and the famous Player. In that time we also turned BCBC into the most watched public broadcaster in Europe. Of course in my time as Director General I regularly met with ECB members. My lasting memories are that we pretended that it was fraternal love and respect which brought us together, but in truth we spent more time arguing about sports rights. I also remember how we came together to help each other in times of immense political pressure. Now, my starting position is that this is a time of rapid change for all media. As a result, it's a particularly difficult time for public service broadcasters. I have divided my analysis into three basic areas – political, technological and economic; but of course the three are all inter-connected. So let's start with the political. In my experience the relationship between the government and public service broadcaster; In other words, it's natural they grow apart over time. Why is that? Simply put, for divergent interests. Now one of the lessons of technology is that it

I started as a journalist before occupying a range of managerial positions over 15 years. I then joined the BCBC and in my 6 years in charge we developed revolutionary services such as, 5 digital television channels and the famous iPlayer. In that time we also turned BCBC into the most watched public broadcaster in Europe. Personal anecdotes Of course in my time as Director General I regularly met with ECB members. My lasting memories are that we pretended that it was fraternal love and respect which brought us together, but in truth we spent more time arguing about sports rights. I also remember how we came together to help each other in times of immense political pressure. Now, my starting position is that this is a time of rapid change for all media. As a result, it's a particularly difficult time for public service broadcasters. I have divided my analysis into three basic areas – political, technological and economic; but of course the three are all inter-connected. Body Point 1: Going into more detail Body Point 2: Going into more detail Body Point 2: Going into more detail Now one of the lessons of technology is that it's essential the organisation stays on the cutting edge in the technological game. It doesn't work to shut your eyes and hope the world		
Explain presentation purpose		
Explain presentation purpose My position is this. I believe that for political, economic and technological reasons, public broadcasters are looking at the future and questioning what their role will be, and that is what I will be addressing today. The goal of my presentation is to help and explain the future role of public broadcasters. Beginning But first let me start by explaining my background. I started as a journalist before occupying a range of managerial positions over 15 years. I then joined the BCBC and in my 6 years in charge we developed revolutionary services such as, 5 digital television channels and the famous iPlayer. In that time we also turned BCBC into the most watched public broadcaster in Europe. Personal anecdotes Of course in my time as Director General I regularly met with ECB members. My lasting memories are that we pretended that it was fratemal love and respect which brought us together, but in truth we spent more time arguing about sports rights. I also remember how we came together to help each other in times of immense political pressure. Now, my starting position is that this is a time of rapid change for all media. As a result, it's a particularly difficult time for public service broadcasters. I have divided my analysis into three basic areas – political, technological and economic; but of course the three are all inter-connected. So let's start with the political. In my experience the relationship between the government and public service broadcaster inevitably worsens over time. By and large I believe it's due to their very different roles in society. In other words, it's natural they grow apart over time. Why is that? Simply put, for divergent interests. Now one of the lessons of technology is that it's essential the organisation stays on the cutting edge in the technological game. It doesn't work to shut your eyes and hope the world		My name is (pause) Peter Williams and I was the

It doesn't work to shut your eyes and hope the world		
won't change; technology is moving faster than ever.		won't change; technology is moving faster than ever.

Body Point 3: Going into more detail	Finally I'd like to turn to what all of this is doing to
	the economics.
	I am very doubtful whether advertising will sustain
	the number of channels each country is creating.
	The big losers in this are advertiser-funded public
	broadcasters with their declining audiences.
Conclusions	So to summarise my analysis these are
	challenging times from changing technologies to
	politics and difficult economic times.
	To change things at the BCBC, I asked everybody in
	the organization two questions. First, "what do we
	need to change to improve our service to the public?"
	Secondly, "what can I do to make your life better?"
Conclusions	So the first rule is that you have to get all your staff
	on your side and moving in the same direction.
	The second conclusion I have reached is that in
	today's world we live in we have to be at the forefront.
	Which brings me on to the third conclusion: don't
	be afraid of radical change and of doing it quickly.
Inspire action	I believe public broadcasting matters for society.
	I believe the values of public broadcasting matter for
	society.
	But what public broadcasting can't do is just sit and
	wait, and talk about the good old days. That way
	lies decline and fall. Time is of the essence.
	Society needs us, needs public broadcasting to help
	shape society's values.

Author

My name is Christopher Wright and co-director of TETC, The English Training Company (www.englishtco.com).

My company TETC and I have helped thousands of companies and professionals succeed in Business English and to become advanced Business English speakers.
